PACKAGING TYPES (Block 18)	MODES OF TRANSPORT (Blocks 10 – 12)																																																									
1 Drum 6 Composite Packaging	R = Road																																																									
2 Wooden Barrel 7 Pressure receptacle	T = Train/Rail																																																									
3 Jerrican 8 Bulk	S = Sea																																																									
4 Box 9 Other (Specify)	A = Air																																																									
5 Bag	W = Inland Waterways																																																									
UN Class/	H Number																																																									
1	H1	Explosive																																																								
3	H3	Inflammable liquids																																																								
4.1	H4.1	Inflammable solids																																																								
4.2	H4.2	Substances or wastes liable to spontaneous combustion																																																								
4.3	H4.3	Substances or waste which, in contact with water, emit inflammable gases																																																								
5.1	H5.1	Oxidizing																																																								
5.2	H5.2	Organic peroxides																																																								
6.1	H6.1	Poisonous (acute)																																																								
6.2	H6.2	Infectious substances																																																								
8	H8	Corrosives																																																								
9	H10	Liberation of toxic gases in contact with air or water																																																								
9	H11	Toxic (delayed or chronic)																																																								
9	H12	Ecotoxic																																																								
9	H13	Capable, after disposal, of yielding another material, e.g. leachate, which possesses any of the characteristics listed above.																																																								
FOR USE BY CUSTOMS OFFICERS
